

EARTHQUAKE CATALOG UPDATE FILES

EARTHQUAKE CATALOG FILES FOR USE WITH EQSEARCH

Effective in August 2004, a new procedure is being implemented for the distribution of updated earthquake catalog update files for use with EQSEARCH. Instead of the previous annual subscription program (for updates issued twice a year), the files will now be distributed, one at a time, to users upon their specific request. The catalog will continue to be updated twice yearly (typically in February for files through December of the previous year, and in August for files through June of that year), but the user will need to make a specific update request when he wants the new files. This change has become necessary because of the large number of users needing updates and frequent changes to their e-mail addresses. It has become hard for me to keep up.

As before, the updated earthquake event information will continue to be derived from the U.S.G.S. Earthquake Database System in Colorado. Events that were previously marked as preliminary will be updated and new events will be added to the file. The resulting ALLQUAKE.DAT file will contain all of the earlier events as well as the new updated events. Also, as before, the original update files sent from the U.S.G.S. will be included with the distribution e-mails.

The cost for the new catalog files is \$20.00 (+ tax). If you want to obtain a copy of the data files, please use this form. If you have any questions, or if you want to place an order, please contact us. If you have any questions, please contact us. (Web site address: <http://thomasfblake.com/>)

Please make check payable to: _____ Copy of Updated Catalog Files for both EQSEARCH (Sent by e-mail
only (\$20.00 each + tax) (Each set includes catalog file and original
USGS data files)
